

**FOR IMMEDIATE RELEASE**

BMHA has received questions about how it responds to reports from Middletown tenants of possible gas leaks. BMHA does not have on staff personnel who are qualified to deal safely with possible gas leaks. Thus, our long term and consistent practice is to tell tenants in Middletown who report that they smell gas to immediately report that to Duke Energy. We have found Duke Energy to be responsive to reports of possible gas leaks and we believe that their crews are well-trained.
